**High Frequency** - Public hugs, cuddles, hand-holding, and longing stares abound. Wear a gas mask to withstand the love-infused atmosphere and quickly remove yourself from the area.

**Medium Frequency** - Moderate displays of affection at some hours. Walk through or study here, but beware. You never know where the love-bugs could be lurking.

**Low Frequency** - Little to no signs of love or attraction in the air. Excellent atmosphere to study or hang out with virtually no chance of seeing personal displays of affection.
